# What is Synthetic Aperture Radar?

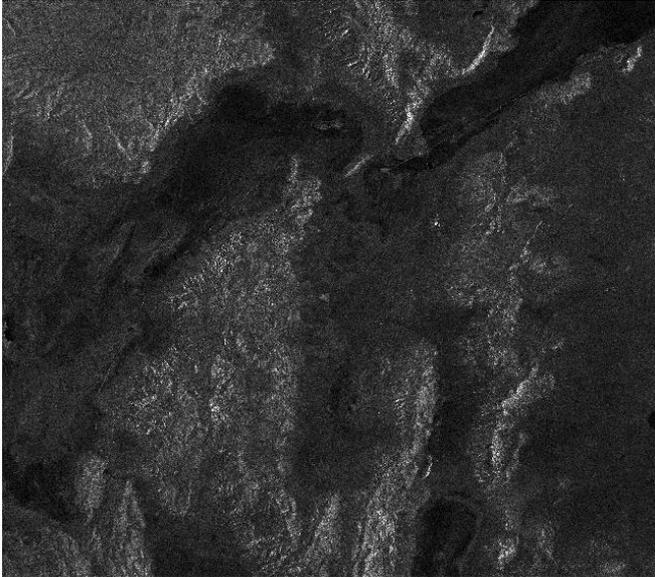

# What is Synthetic Aperture Radar?

# Backscatter Results: Amplitude and Phase

## Amplitude/Intensity ( $A^2$ )

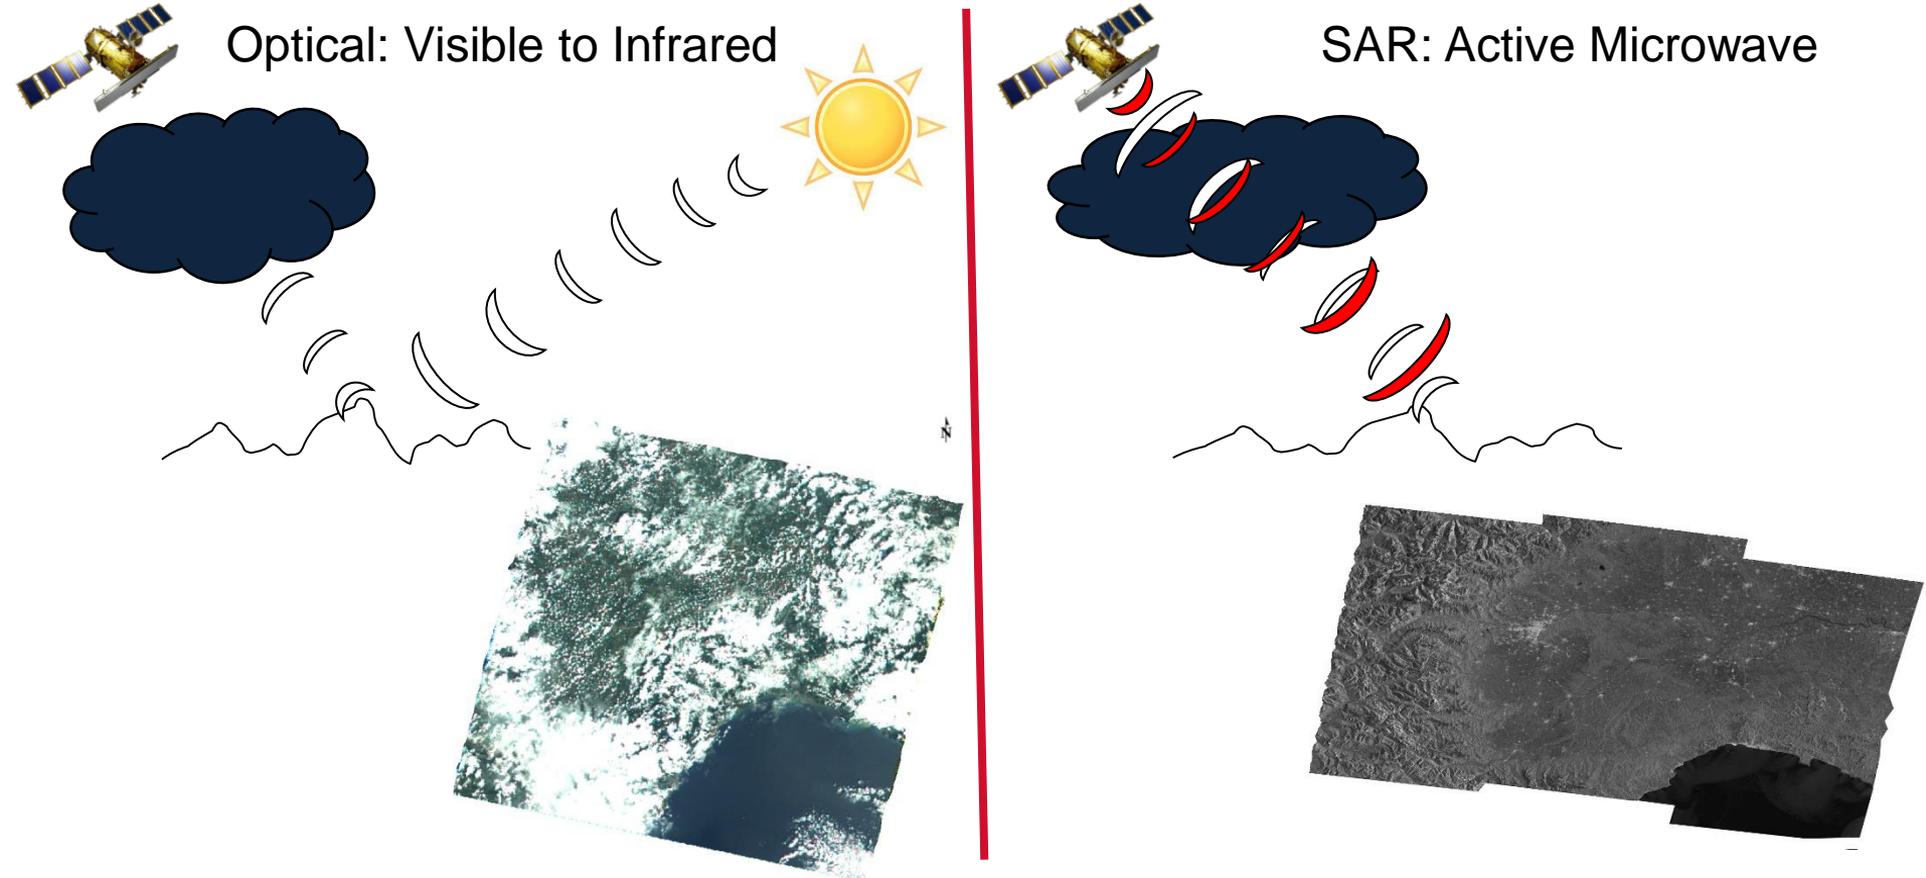

Amplitude shows visual characteristics based upon scattering returns, which can give us information on surface roughness and dielectric properties.

## Phase

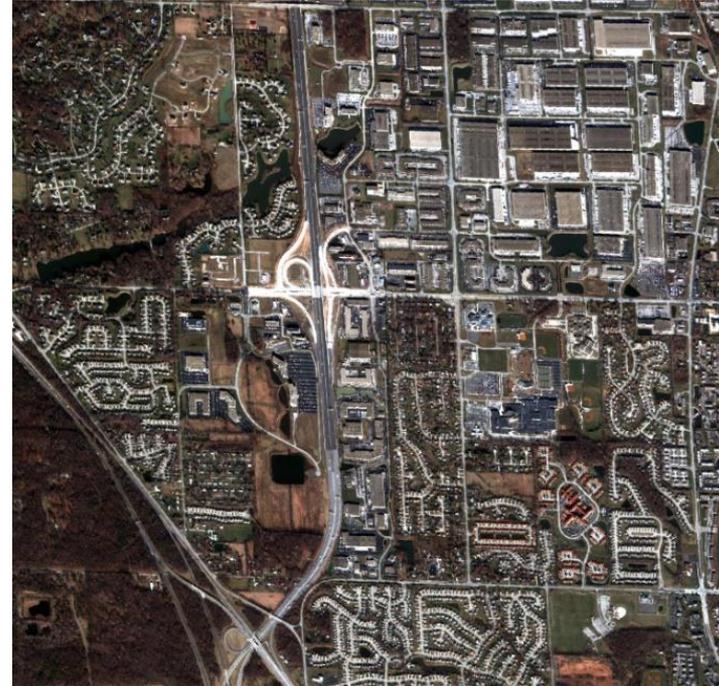

The phase of one scene may not be visually useful, but phase allows for powerful techniques such as polarimetry and interferometry over multiple scenes.

# Why SAR?

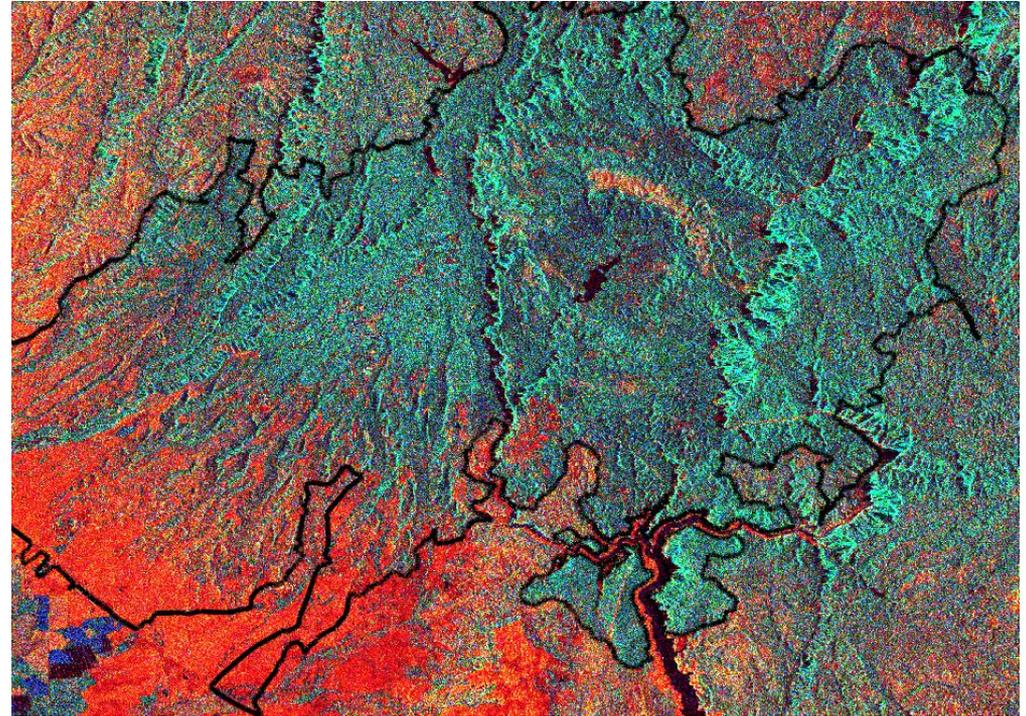

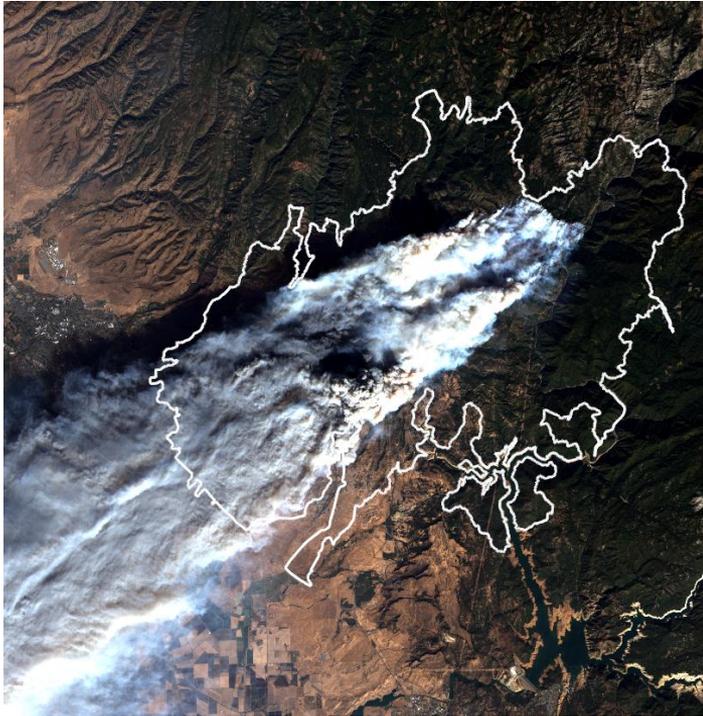

TerraSAR-X -Indianapolis  
07/01/ 2007

QuickBird - Indianapolis  
07/01/ 2007

## Optical imagery during Camp Fire vs SAR imagery of extent during the fire

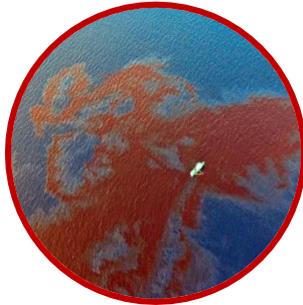

# Synthetic Aperture Radar Applications

Landslides

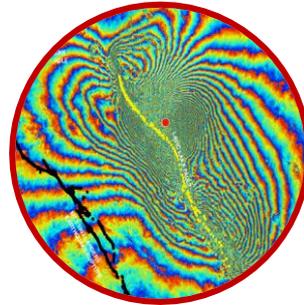

Glaciers and  
permafrost

Oil spills

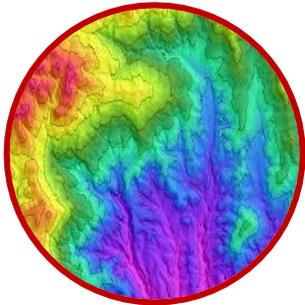

Subsidence

Earthquakes

Shipping

DEM  
generation

Biomass

Deforestation

Flooding

Volcano  
monitoring

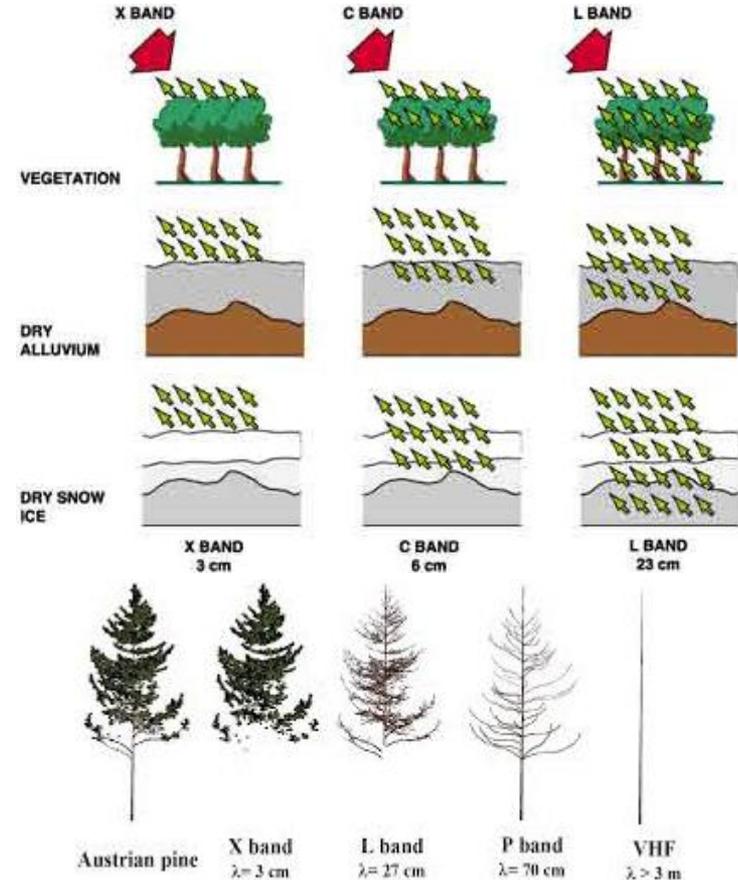

Activity  
monitoring

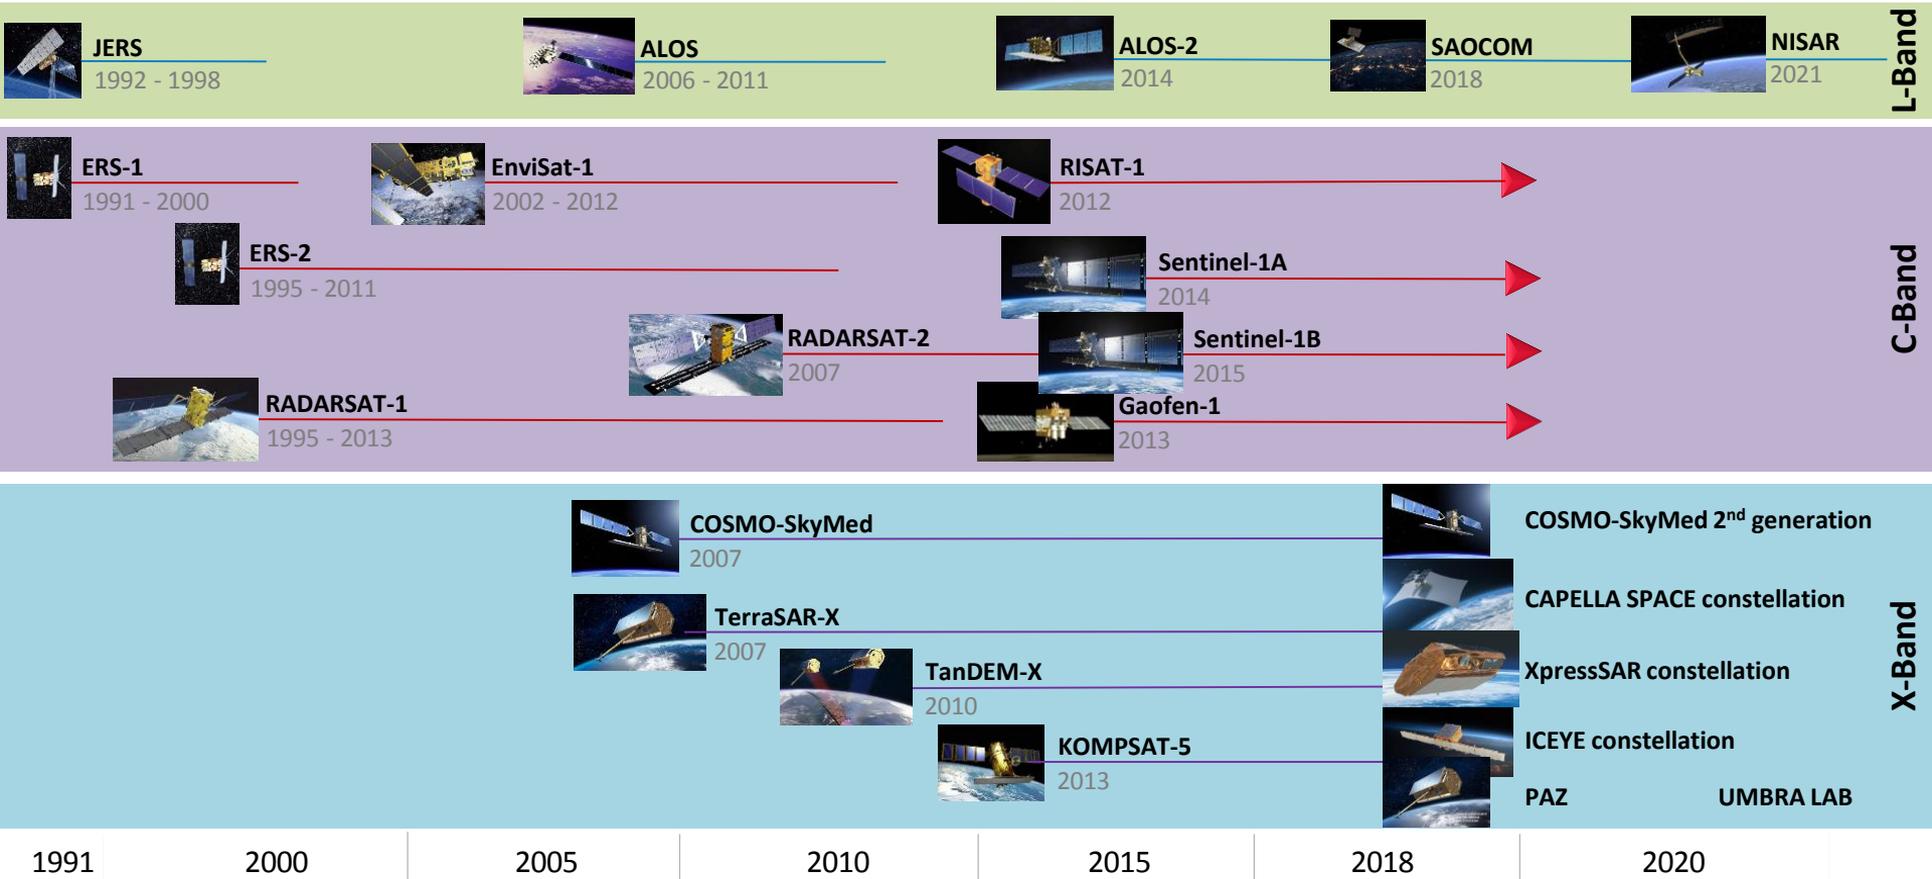

# Radar frequency and applications

Band	Frequency	Applications
VHF	300 kHz - 300 MHz	Foliage/ground penetration, biomass
P	300 MHz - 1 GHz	Biomass, soil moisture, ground penetration
L	1 - 2 GHz	Agriculture/forestry, soil moisture, ground penetration
S	3-4 GHz	Agriculture, biomass, ocean
C	4 - 8 GHz	Ocean, agriculture, general surface investigation
X	8 - 12 GHz	Ocean, agriculture, general surface investigation (high resolution)
Ku	14 - 18 GHz	Glacial/ice, snow cover
Ka	27 - 47 GHz	Glacial/ice, very high resolution imagery

# Synthetic Aperture Radar satellite missions

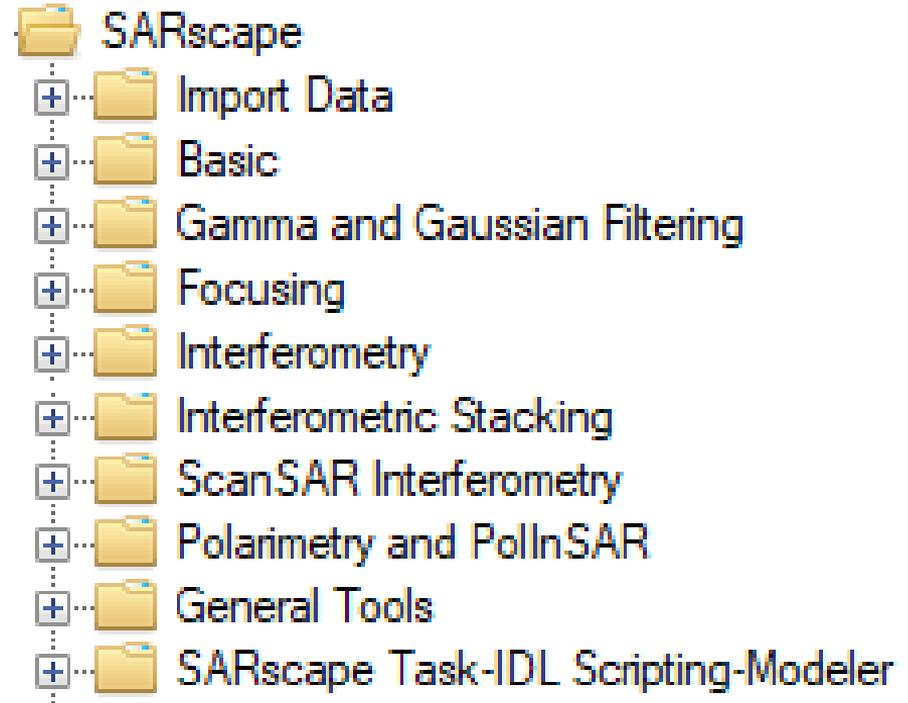

Import

Multilooking

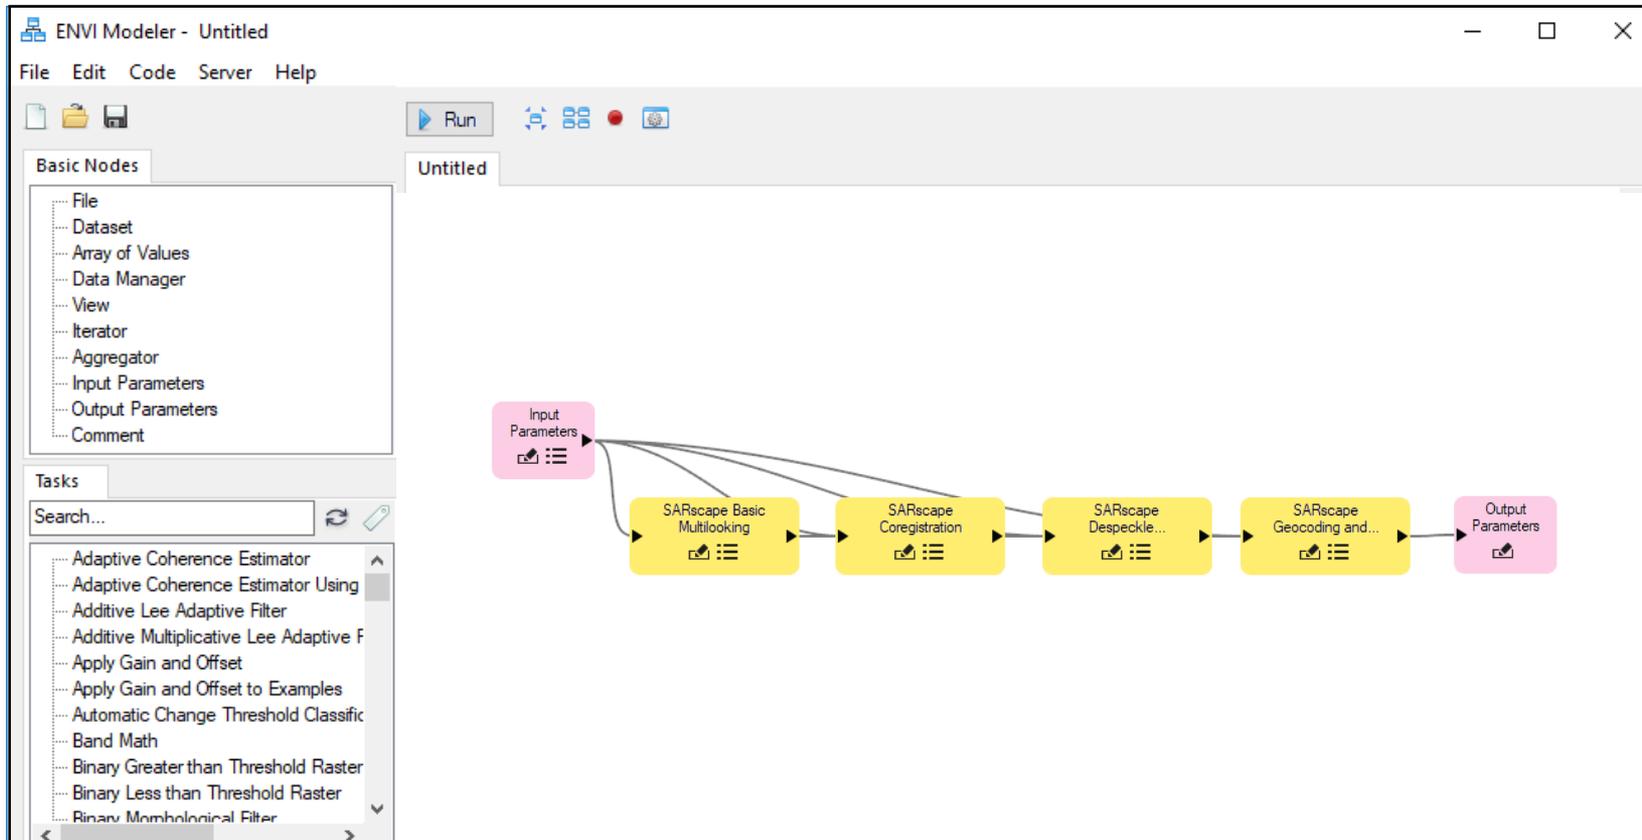

Coregistration

Filtering

Geocoding & Radiometric calibration

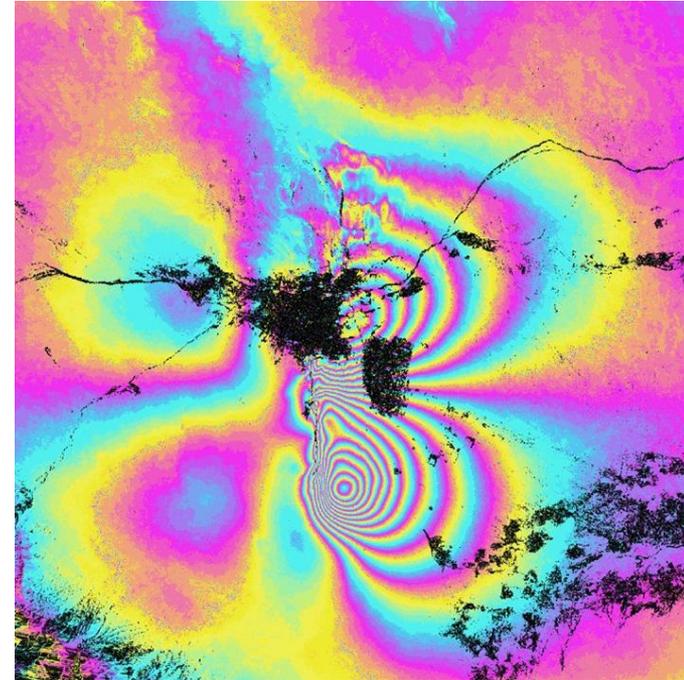

# SARscape data processing in ENVI

# SARscape data processing in ENVI

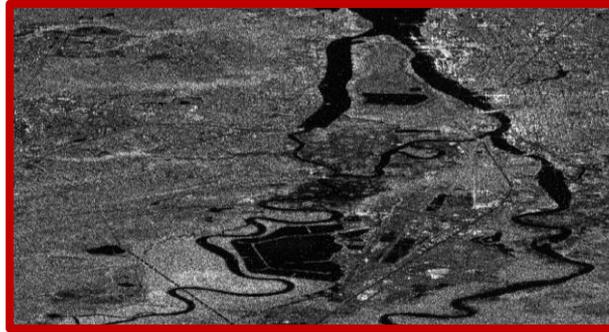

- Import
- Multilooking
- Coregistration
- Filtering
- Geocoding & Radiometric calibration

## Import

- Subset by ROI
- Choose polarization
- Mosaic same track

Imported Sentinel-1

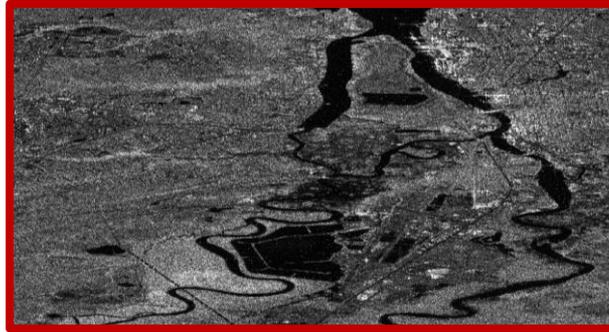

## Import

- Subset by ROI
- Choose polarization
- Mosaic same track

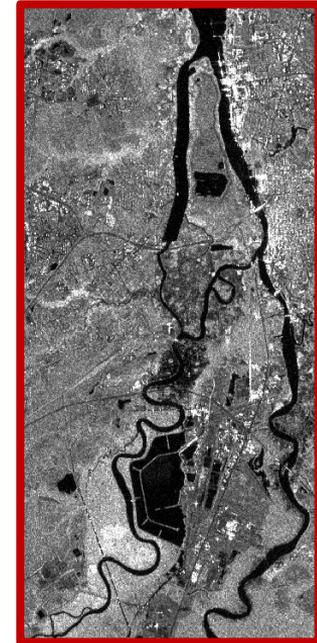

## Multilooking

- Choose grid size
- Removes speckle
- Convert to ground range

Imported Sentinel-1

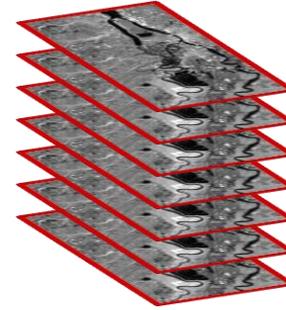

Multilooked

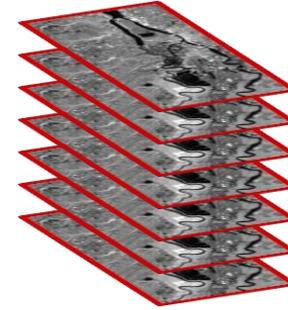

## Coregistration

- Aligns pixel footprints when working with overlapping images
- Critical step for multitemporal analyses

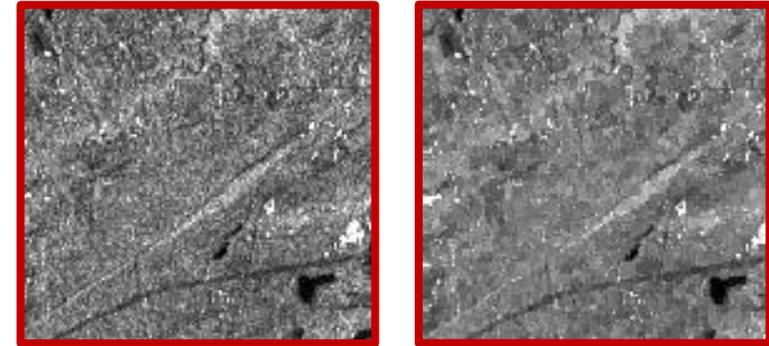

## Coregistration

- Aligns pixel footprints when working with overlapping images
- Critical step for multitemporal analyses

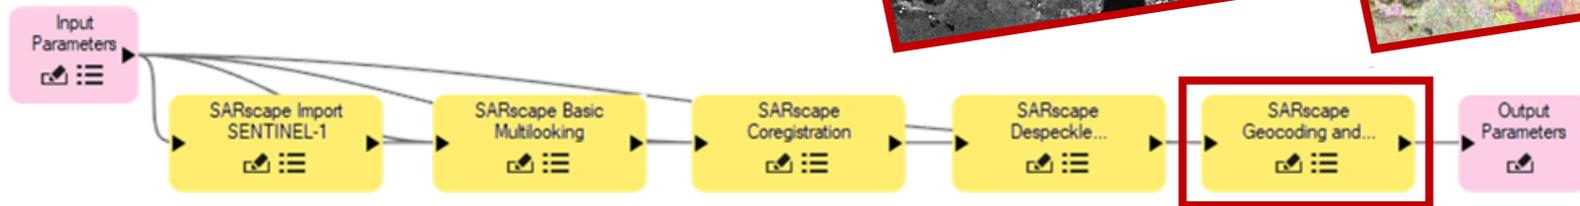

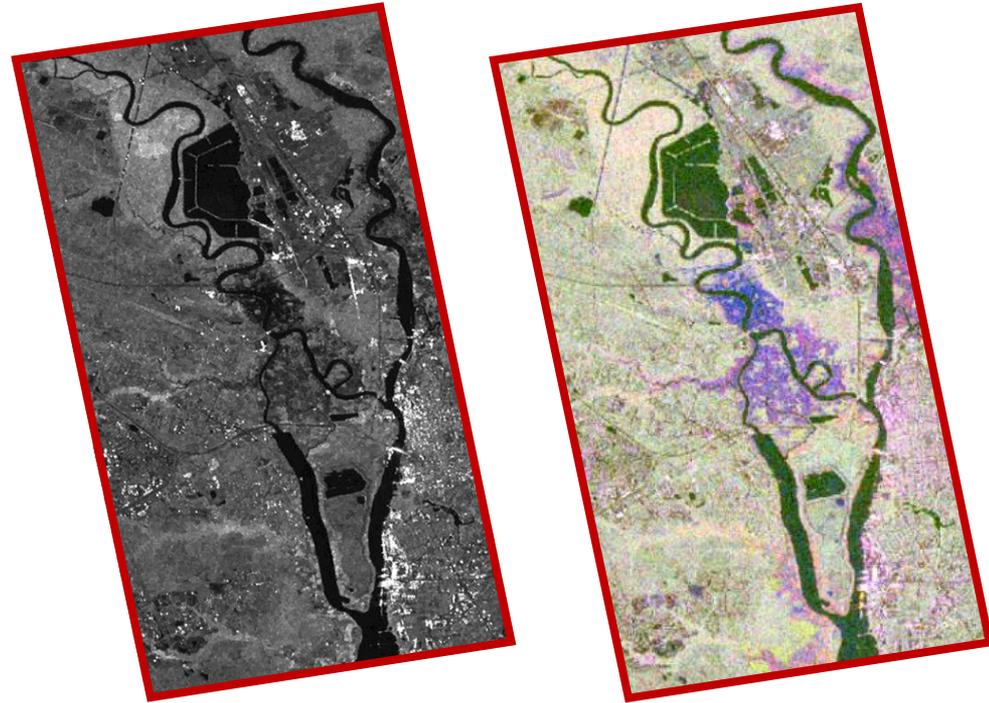

## Filtering

# Geocoding and Radiometric Calibration

## Geocoding & Radiometric Calibration

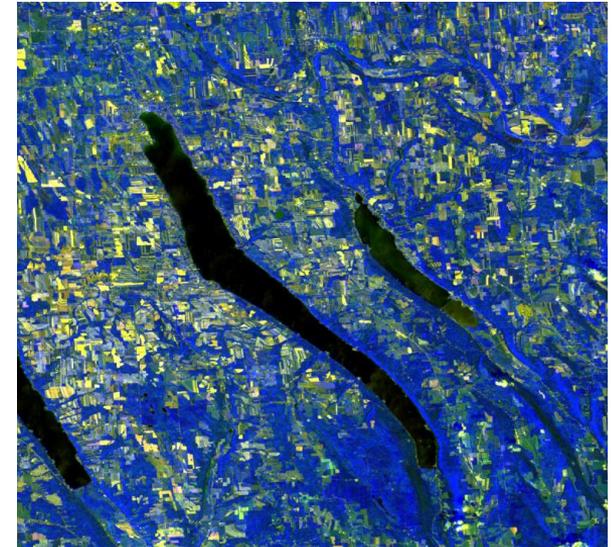

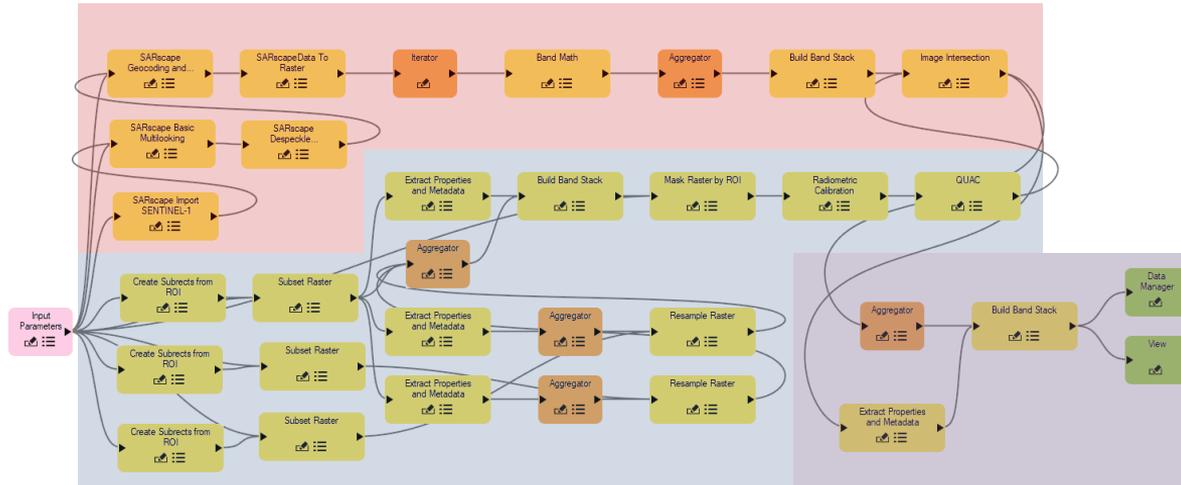

- Apply projection
- Calibrate backscatter intensity to allow for direct comparison to other scenes

# SARscape and the ENVI modeler

Automate and batch process your data in the ENVI modeler with SARscape tasks

Full preprocessing and fusion of Sentinel-1 (all bands) and Sentinel-2

Skaneateles Lake, NY  
Red- Red (Sentinel-2)  
Green- Green (Sentinel-2)  
Blue- VV (Sentinel-1)
